

Akshara

- The College Newsletter

November 2016 | Volume: 6 | Issue : 3

Principal's Message

Dear students,

Aurora believes not only in imparting knowledge and information but also developing character and personality. We broaden our students' outlook and make them adaptable to the changing needs and requirements of the society. As a result, our students unlock their creative minds that can change the world

We always look forward to innovation in every field. Akshara has been playing an important role in showcasing the contemporary happenings at Aurora and also providing a platform for our students to display their talents. It has become a medium for unique articles on a variety of topics such as cinema, literature, sports as well as our educational values.

This edition of Akshara, like the ones before, bears the distinctive stamp of quality, making it a delightful read. I congratulate the editorial board for their work that made this issue another successful endeavour. Have a great time reading!

Editorial Board

Hello dear readers,

Voltaire said, "Writing is the painting of the voice" and our Newsletter is a beautiful canvas painted by the students of Aurora. Our students speak about various topics that matter in the society and Akshara presents the best of them in the most creative manner.

This edition of Akshara is being presented to our esteemed readers who have inspired us to publish one issue every month. Besides articles that explore awesome literary talents, this month's edition is packed with activities around the college and achievements by Aurorians.

The editorial board thanks its contributors and readers for supporting us to do better every time. Happy reading!

Viswanadham Bulusu (Principal)

Dr. Rachel Irdaya Raj

Never Give Up

"The sweetest victory is the one that's most difficult". Since eons, we have been told that, success depends on an individual and not on

circumstances, which has also been proven right till date. For instance, Sir Thomas Edison, whose most memorable invention was the light bulb, had a thousand failed attempts before he developed a successful prototype. "How did it feel to fail thousand times?" a reporter asked. "I didn't fail thousand times," Edison responded. "The light bulb was an invention with thousand steps". Edison taught us a lesson of being positive and never giving up with great simplicity.

"Success is a lousy teacher, It seduces smart people into thinking they can't lose", said Bill Gates. He mentions over-confidence as a leading path to failure. But many of us are so focused on not failing that we don't aim for success; instead settling for a life of mediocrity.

Motivation, hard work, dedication and confidence are all needed for success. It's better if we work hard in silence and let our success make the noise. Only then will the world respect us and remember us.

Book Review

To Kill a Mockingbird

To Kill a Mockingbird is fundamentally a novel that deals with coming of age and growing up in a tired old town of Maycomb, Alabama. The title refers to the local legend that it is a sin to kill a Mockingbird. This story itself is told in the first person by a six-year old girl, Scout, with the prose of a well-educated adult. Author Harper Lee has made an attempt to confine the information of the text to what Scout would actually know, but it is no more than a casual gesture toward plausibility.

Lee explores the setting and the irrationality of the adults with an exuberant sense of humor in the naive sense of Scout and Jem Finch, assisted by their friend, Dill. The story, as seen through the young eyes of Scout and her brother, Jem, illustrates the town, whose conscience is steeped in prejudice. The memoir grips our imagination through the vivid description of their father, Atticus, and his one-man battle against the townspeople to protect the story's real mockingbird, Tom, a black man, who is falsely charged with the rape of a white girl.

What makes 'To Kill a Mockingbird' truly unparalleled is not just Scout's refreshing innocence or the small town pre-reformation reality, but it is Atticus' staunchly indomitable spirit and his absolute ingenuity. From his epic speech in the courtroom that moves the reader to tears, to his simple and firm upbringing of his children, he stands a true role model even in modern literature. He is the real hero of the story as he struggles for justice in the contemptuous town, which refuses to see past its bigotry, even when the truth stares in its face. This shows his prodigious endurance and determination.

A variety of adults, mostly eccentric in Scout's judgment and a continuous bubble of incident, makes this novel a pleasant, laughter-evoking and undemanding read.

Alumni Desk

1. How was your life at Aurora?
It is a journey worth remembering. The ups and downs and the entire learning process at Aurora have made me the confident man I am today.
2. How did Aurora contribute to what you are today?
Development of my skill set took place at Aurora. Participating in various competitions held in the college, inter-college fests and at the University level (PRERNA), organising various events like ABHIYAAN and AAKANKSHA for the college, being part of a short film, participating in the theatre competitions, representing the college at IIM, Ahmedabad – all these improved my skills and my overall personality. Faculty at the college such as Dr. Rachel Irdaya Raj, our English faculty, were always supportive. When I completed my graduation, I was a more confident person, ready to take on any challenge.
3. What was the turning point in your life?
It was after my graduation, when I was preparing for civil services and simultaneously convincing my family to allow me to join the Indian Army. By God's grace, everything fell into place. I cleared my CDS (Combined Defence Service) entrance exam and then SSB (Service Selection Board) subsequently in the first attempt.
4. Could you share one of your best memories at aurora?
There are countless memories, but one among them is when we had won an inter-college competition organised by St. Francis College for Women, by competing with the best colleges of the city.

Lieutenant Heet Mehta
B.Com - Honours
Batch 2009-2012

5. Tell us something about how your interest in the Defence Services.
Defence Services, and especially the Indian Army, always inspired and fascinated me right from childhood. The passion for joining the forces increased with time. The nature of the forces and the work they carry out is what always impressed me. They lead by example, live by chance, love by choice and kill by profession. "INDIAN ARMY – A life less ordinary"
6. How has life changed for you after you joined the army?
Training at the Officers Training Academy for the Indian army transformed me, making me a scholar, a warrior and a true gentleman. My perspective towards life has completely changed. Service before self has been ingrained in us during the training. The motto of Indian army is what I live by,

"The safety, honour and welfare of your country comes first, always and every time. The honour, welfare and comfort of the men you command come next. Your own ease, comfort and safety come last always and every time"
7. Your message to us Aurorians.
Always follow your heart- it knows you better. Pursue your dreams as they demand hard work, determination and perseverance. Live life on your terms and never have any regrets in life. And I'd like to add - acknowledge the sacrifice made by our armed forces. "Sleep peacefully at your homes, Indian Army is guarding the frontiers." JAIHIND!!

College Events

Pi-Day

Pi (Greek letter " π ") is the symbol used in mathematics to represent the ratio of the circumference of a circle to its diameter, which is approximately 3.14159. It continues infinitely without repetition, which makes for interesting challenges to calculate more and more digits beyond the decimal point. To enlighten the students on the history, importance and the application of Pi in Mathematics, Pi Day was celebrated on 22nd July at Aurora. Charts and posters were used to showcase the influence of Pi. Through presentations, the audience was educated on the ways in which Pi is used.

Micro Expo - 2016

Microbes play a key role in human welfare. Microbiology helps us understand the significance of good and bad microbes in our lives. Micro-Expo is an initiative by Aurora to inspire students to take up research in the field of medical microbiology and to enlighten the students on the proper use of antibiotics. The event was organized on the 5th & 6th of August. Several experiments related to medical microbiology were conducted. Students also displayed posters on the works and contributions of Alexander Fleming.

National Conference on Information and Communication Technologies Research

A two-day National Conference on Information and Communication Technologies Research – Challenges and Opportunities was organized by the Department of Computer Science on the 19th and the 20th of August at Aurora. The objective of this event was to provide a platform for exchanging ideas on innovations in ICT Research and for students to interact with Scientists and Industrialists. Researchers from different fields such as Digital Image Processing and Bio-Informatics were invited to present their papers. After the Plenary Session by Dr. Kannan

Srinathan, papers were presented by the participants. The forenoon session was chaired by Dr.Kannan Srinathan and the afternoon session by Prof. Radhakrishna. On the second day a lecture on Big Data Analytics was given by Dr. A.V. Krishna Prasad, Professor, CSE Department, KLU. Certificates were presented to the participants during the valedictory function.

Seminar on Capital Markets

An Investor Education Program was organized in association with Bombay Stock Exchange on 17th September to create awareness on the opportunities and risks related to Capital Market. Dr. Bhavanarayana Kandala was the resource person for this event. About 85 students participated in the event, which focused on several issues related to capital markets and reforms carried out by SEBI. The speaker educated the audience about the precautions to be taken while investing in stock markets.

World Tourism Day

Tourism has several benefits, including economic and infrastructure growth. To foster awareness among students about the importance of tourism, a World Tourism Day event was celebrated on 27th September. Charts were displayed to show the social, cultural, political and economic values that are developed through tourism. A photo gallery competition of the best tourist destinations was also conducted.

IT Club-Event

On the 20th of every month, an event is conducted by Aurora's IT Club to facilitate learning beyond the classroom. 'Introduction to Ethical Hacking' was the topic chosen for the month of July. The ability to assess and measure threats to information assets was discussed.

NGRI Visit

Aurora has always believed in the concept of learning outside the classroom. On 17th October, our students attended NGRI's 'Open Day' Program. The visit helped students

rekindle their interest in geophysics and allied sciences by participating in the exhibition. It illustrated the institution's work in areas from tsunami study and seismology-recording to planetary-volcanism and Mars-quakes.

World Osteoporosis Day

Life is a precious gift that we must cherish and protect. Some of us are born with all the comforts and not a care in the world. However, there are those of us who have to face some of the most difficult challenges. Osteoporosis is one such challenge. It's a disease which causes bones to become weak and in worst case scenarios, the bones become too brittle and break. Most people don't have any symptoms until there's a bone fracture and it doesn't have a cure, making it a deadly disease. To create awareness about Osteoporosis, an event was organized on the 20th of October. Through charts and presentations, the audience was enlightened on the deficiencies caused due to wrong eating habits, the symptoms, causes, and the methods of prevention.

Karl Weierstrass' Birthday

Karl Weierstrass was a German Mathematician who is well-known for his construction of the theory of complex functions by means of power series. He is considered the father of modern analysis. To recognize his mathematical contributions, his birthday was celebrated on 31st October. Charts were displayed, which educated the audience about his life and work. Through a seminar, his work in the calculus of variants was discussed. It was an inspiring event for budding mathematicians.

Birthday Celebrations of Sardar Vallabhbhai Patel

Sardar Vallabhbhai Patel played an important role in India's struggle for independence. He is popularly known as the Iron Man of India. On 31st October, to mark his prominence, an event was organized in the college. Through charts and presentations, the audience was enlightened on the life and contributions of Sardar Vallabhbhai Patel's extraordinary existence.

Trip to North India:

Aurora believes in educational trips, which provide not only a welcome break in the routine but also a unique bonding experience. In late September, 2016, a team of faculty and students visited several popular places in the Northern part of India. The team arrived in Agra on the 28th of September. They visited the world-renowned Taj Mahal and Fatehpursikhri. The next day, they experienced the wonders of the Mathura Temple. Later, they visited Akshardham in Delhi and were enthralled by the mesmerizing carvings found on every wall in the region. The following morning, they enjoyed the pony rides in the Kufri area of Shimla and were captivated by the beauty of the region. On October 1st, on their 12-hour journey to Manali, they visited the Kullu Shawl factory, the Hidimbi Temple, Vashisht kund and the Solang Valley. Paragliding at the valley was a novel experience. The tour's organizers arranged a complimentary musical night for the students, before a 14-hour road trip to Amritsar. The following day, they visited the famous places in Amritsar such as the Jallianwala Bagh, the Golden Temple and the Durgiana Temple. The students also had fun shopping at the famous Karol Bagh and Palika Bazaar. On 5th October, they visited the Birla Mandir, Parliament house, Qutub Minar, India Gate and Raj Ghat. They made their way back to Hyderabad after boarding the GT express train from Delhi to Warangal. The tour was packed with fun and memorable moments. It was a delightful experience for all of them.

Social Activities

Eco-Friendly Ganesh Festival

To be eco-friendly is to focus on not harming the environment. Aurora believes in safeguarding the environment. The college celebrated the Ganesh Festival on the 5th October with great fervor. Following the theme of celebration, an Eco-friendly Ganesh was set up at Aurora on 3rd September. Decorated with green foliage, the clay idol was painted with natural colors. The rest of the proceedings were carried out in an organized and eco-friendly way.

Swachh Bharat

The Swachh Bharat Abhiyan is a noble cause that aims to improve cleanliness in India, one step at a time. The faculty and students of Aurora took part in the Swachh Bharat drive on 5th October near Sundarayya Park. The event was inaugurated by Zonal Commissioner, Mr. Gaurav Uppal, IAS. The task of cleaning up the surrounding areas was taken up. Steps to maintain the cleanliness were also suggested. The Walkers Club of Sundarayya Park offered their support to the volunteers.

Bathukamma Festival

Bathukamma is a symbol of Telangana's rich culture. The seasonal flowers showcase the beauty of Telangana's traditions. It is celebrated by the women of Telangana, to showcase the

magnificence of multitudinous flowers. On 1st October, an event was organized in the college to recognize the importance of this floral festival. A Bathukamma setting up competition was held. Fruits and flowers were distributed. It was a learning experience for everyone involved.

Nag Panchami Awareness Program

Snakes are among the top predators within sensitive habitats across the world and as such play an important role in the functioning of many ecosystems. Recent studies have revealed an alarming decline in the snake numbers. Like all other animals, they have an important role on this planet. In our country, the tradition of snake-worship has existed for centuries. Nag Panchami is a sacred festival dedicated to the Snake-God for prosperity. This year, it was on the 7th of August. To create awareness about the importance of snakes, Aurora's ARPF student volunteers teamed up with the officials of the Forest Department to rescue snakes from charmers. This seven-day program, from 5th to 11th of August, had six select volunteers visiting Indore to give proper treatment to the rescued snakes and to make sure they are free to live in their natural habitat.

NSS

National Voluntary Blood Donors' Day was observed on 1st October 2016. To mark the occasion a rally was flagged off at Aurora's Degree & PG College which concluded at Sundaraya Vignam Kendram. Many of our faculty members and students donated blood. Principals of eight colleges including our Principal Mr. Vishwanadham Bulusu were felicitated. NSS program Officer Mr. Malleshwar and Mrs. Megharani Giri were also appreciated for their contribution towards the programme.

NSS day was Celebrated in JNFAU on 2nd October 2016. Our alumna Sunidhi Reddy of B.Com Honours Stream was awarded with the BEST NSS Volunteer State award on that day.

Our College won the NSS Best Volunteer Trophy in an event organised by the Vandemataram Youth Front on the occasion of Independence day.

Sports @ Aurora

Aurora's Degree & PG College had the privilege of hosting the Osmania University Inter-College Chess Tournament from 22nd to 24th September, 2016. The chief guest for the event was Prof. P. Venkat Reddy, PCET Convenor and Former Dean. The other guests who graced the occasion were Prof. Rajesh Kumar, Secretary, Board of Control, Inter-University Tournament, OU and Dr. B. Sunil Kumar, Secretary, Inter-Collegiate Tournament for Men, OU. The program began with an inspiring note by our Principal, Shri. Vishwanadham Bulusu. Shri. K. Jaipal Reddy, Organizing Secretary & Physical Director of our college presented the annual

sports report. Prof. P. Venkat Reddy was felicitated on the eve of his retirement. The tournament was kick-started with the first move being made by the guests. The icing on the cake was the moment when our college won the tournament.

We're proud of you, chess champions!!!

Movie Review

The Dark Knight

In general, there are certain norms in film-watching and despite the innovations in the field of cinema, those norms remain untouched. One among them is the hero-villain theory, where the audience takes the protagonist's side, no matter how convincing the antagonist is. Though there are many movies in the history of cinema that broke this pattern, such as *The Silence of Lambs* or *The Star Wars Series*, it is *The Dark Knight* that has the most significance in pop-culture. From tees to phone covers and internet memes, one can find the scarred face with green hair everywhere even 8 years after the film's release- such is the popularity of Heath Ledger's interpretation of the Joker. The credit here not only goes to the actor's unmatched performance but also to the character's portrayal adopted by the Nolan brothers.

Though it has the tag of a superhero movie, and a sequel to *Batman Begins*, *The Dark Knight* doesn't adopt the cinematic clichés of usual superhero movies. The film is more of a philosophical interpretation of DC's characters in a perfectly humane way. This is what made the movie special- there are no gravity-defying sequences or super-powered creatures; one can only see human nature exploring crime, self-guilt, societal living and punishment.

The plot of TDK revolves around the Joker influencing the fallen crime syndicate of Gotham city, taking it to unexpected levels to achieve personal satisfaction. Batman, on the other hand, makes desperate attempts to stop him amidst the emotional struggles with his alter ego, Bruce Wayne. The plot's aesthetic implication of Iraq War, American governmental system, societal standards and human tendency makes the movie more interesting.

The film is a marvel of cinematic excellence right from coloring to visual effects. Depending less on vfx, the movie had grand special effects in trademark Christopher Nolan style. His film-making standards are of exceptional levels- no wonder he is the best film maker of the current generation. Jonathan Nolan's scripting, supported by Christopher Nolan is of greater standards – greatest in the superhero genre. While Heath Ledger's Joker makes one go crazy, Christian Bale as Batman is controlled and mature, what an actor he is! Michael Cane, Maggie Gyllenhaal, Morgan Freeman & Gary Oldman as Inspector Gordon with Aaron Eckhart as Harvey Dent form a superior supporting cast.

The best thing about *The Dark Knight* is that it has all the great elements one would least expect from a superhero movie!

Poets' Corner

Friendship

Friendship is an affliction which works
on trust
It is a connection where there's no
unjust
In friendship honesty is must
It is on the pillars of Core, Mantle and
Crust.

Like a mirror, friends show the exact
image of us
They explain our weaknesses and
don't make fuss!
True friends shares both happiness
and sadness
And treat each other with utmost
kindness.

A friend is an expensive medallion
Of every problem, he is the champion
Whether he be Irish, German or Italian
A friend is indeed a true companion.

When the breeze of friendship moves
around with ease
The environment gets filled with
eternal peace.

- Mohammed Asad
B.Com 3 Honours

The Eagle

I wonder why other birds don't live like
me,
I live life in reality, not in fantasy.
I believe in hard work, not in others
dependency.
I am an eagle; I fly alone and live
independently.

I believe God is there to protect me.
I migrate alone, without any fear of
heights,
I always try to find new goal and
believe my decisions are right.
I never lived my life in flock; I want
others to be like me.

- Thakur Sahil Singh
B.Com - Computers 2B

कोशिश कर के तो देख

कोशिश कर के तो देख,
तु हार नहीं जाएगा।
राह तो अपनी तु बनाकर तो देख
युही पार कर जाएगा।

नय्या में सवार होकर तो देख,
तु डुब नहीं जाएगा।
किनारे को पास लाकर तो देख,
समुन्दर पार कर जाएगा।

खुशी क्या है? जान कर तो देख,
तु गम नहीं पाएबा।
उसे अपने गले से लगाकर तो देखे,
तु सबको खुश कर जाएगा।

साथ होता क्या है? जान कर तो देख,
अकेला खुद को न पाएगा।
साथ सबके चलकर तो देख,
सबका प्यार तुझे मिल जाएगा।

आगे तु बढ़ कर तो देख,
तु रुक नहीं जाएबा।
कदम आगे बढ़ाकर तो देख,
सारा संसार तुझे ही मिल जाएगा।

मुस्कान

मुस्कान है एक ऐसी चीज,
जो इन्सान को पूरा करती है
जो चेहरे को चमका देती है, और
सूने आँगन को महका देती है।

मुस्कान - जो रोते को हसा देती है,
नए रिश्ते बना देती है।
जो सारे गमों को भुला देती है, और
सारी दुश्मनी मिटा देती है।

जो रुठे को मना देती है,
जो बैरों को मिटा देती है।
जो गैरों को अपना लेती है, और
बिच्छड़ों को मिला देती है।

जो उलझे को सुलझा देती है,
जो बिगड़ी बना देती है।
जो जीता देती है, और
हर मुश्किल को हँसकर टाल देना सिखा देती है।

एक पहचान बना देती है,
एक नई उम्मीद जगा देती है।
नया विश्वास जगा देती है, और
मन को लुभा देती है।

-हर्ष अग्रवाल

Faculty Column

Mobile Operating System

A mobile operating system is a set of data and programs that runs on a computer or mobile device. It manages all the hardware and optimizes the efficacy of the application software in the device. A mobile OS manages mobile multimedia functions, mobile and Internet connectivity and so on in a mobile device. Mobile OS' are seen in smartphones, tablets, and wearables . They are powered by platforms like

1. Symbian

Symbian OS is officially the property of Nokia. It means that any other company will have to take permission from Nokia before using this operating system. Nokia has remained a giant in the low-end mobile market, so after Java Symbian was the most used in the mobile phones till a couple of years ago. Still Symbian is widely used in low-end phones but the demand rate has been continuously decreasing. By upgrading Symbian mobile OS, Nokia has made it capable to run smartphones efficiently. Symbian ANNA and BELLE are the two latest updates that are currently used in Nokia's smartphones. Overall, the Symbian OS is excellently designed and is very user-friendly.

2. Android

September 20th, 2008 was the date when Google released the first Android OS by the name of 'Astro'. After sometime next upgraded versions 'Bender' and 'Cupcake' were also released. Google then adopted the trend of naming Android versions after any dessert or a sweet in alphabetical order. The other releases are Donut, Éclair, Froyo, Gingerbread, Honeycomb, Ice Cream Sandwich and Jelly Bean. Marshmallow (Android 6.0) is so far the latest Android version from Google. Since the

platform is not closed like iOS, there are too many great Android apps built by developers.. Google Play is an official app market that contains millions of different apps for Android devices. Samsung, HTC, Motorola and many other top manufacturers are using Android in their devices.

3. Apple iOS

iOS was introduced on 29th June 2007 when the first iPhone was developed. Since then iOS has undergone many upgrades and currently the latest one is iOS 9.

Apple has still not allowed any other manufacturer to lay hands on its operating system. Unlike Android, Apple has concentrated more on the performance along with appearance. This is the reason the basic appearance of iOS is almost the same as it was in 2007. Overall it is very user-friendly and is one of the mobile's best operating systems in the world. So far iOS is used in all iPhones, iPod & iPad.

4. Blackberry OS

Blackberry OS is the property of RIM (Research In Motion) and was first released in 1999. RIM has developed this operating system for its Blackberry line of smartphones. Blackberry is much different from other operating systems. The interface style, as well as the smartphone design, is also different having a trackball for moving on the menu and a qwerty keyboard. Like Apple, Blackberry OS is a close source OS and is not available for any other manufacturer. Currently, the latest release of this operating system is Blackberry OS 7.1 is used in Blackberry Bold 9930. It is a very reliable OS and is immune to almost all the viruses.

5. Windows OS

All of you will be familiar with Windows OS because it is used in computers all over the world. Windows OS has also been used in mobile phones, but normal mobile phone users find it a bit difficult to operate it but at the same time it was very popular among people who are used to it. The latest Windows release by Microsoft is known as Windows 7 which has gained immense popularity among all kind of users. With its colorful and user-friendly interface, it has given Windows OS a new life and is currently in demand all over the world. This latest OS is used in very powerful devices made by Nokia. Samsung and HTC also released some Windows-based phones. Nokia Lumia series is completely windows based. Some of the latest Windows Phones are Nokia Lumia 800, Nokia Lumia 900, Samsung Focus and HTC Titan 2.

6. BADA

Like others, Samsung also owns an operating system that is known as BADA. It is designed for mid-range and high-end smartphones. Bada is a quiet user-friendly and efficient operating system, much like Android, but unfortunately Samsung did not use Bada on a large scale for unknown reasons. The latest version Bada 2.0.5. These three smartphones are Samsung Wave, Samsung Wave 2 and Samsung Wave 3.

7. Palm OS (Garnet OS)

Palm OS was developed by Palm Inc in 1996 especially for PDAs (Personal Digital Assistance). Palm OS was designed to work on touchscreen GUI. Some Years later it was upgraded and was able to support smartphones. Unfortunately, it could not make a mark on the market and currently is not being used in any of the latest top devices.

8. Open Web OS

Open WebOS also known as Hp WebOS or just WebOS which was developed by Palm Inc but after some years it became the property of Hewlett-Packard. WebOS was launched in 2009 and was used in a number of smartphones and tablets.

9. Maemo

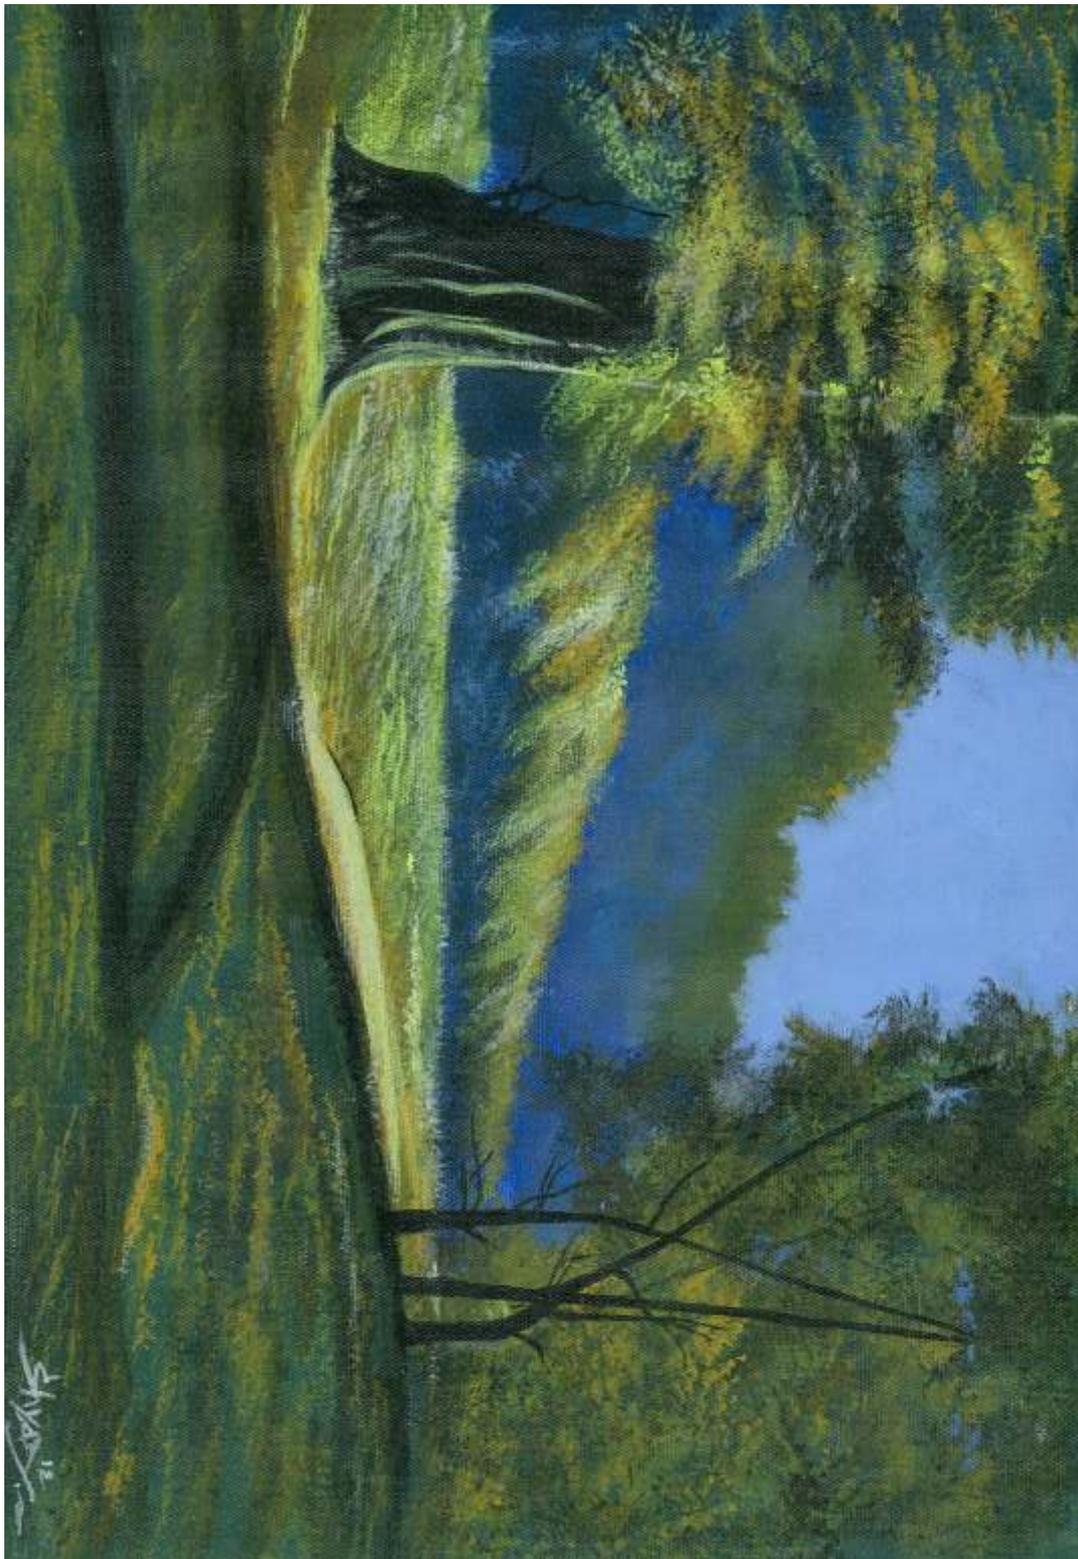

Nokia and Maemo Community joined hands to produce an operating system for smartphones and internet tablets, known as Maemo. Like other devices, the user interface of Maemo also comprised of a menu from which the user can go to any location.. Later in 2010 at the MWC (Mobile World Congress) it was revealed that now Maemo project will be merged with Mobilin to create a fresh operating system known as MeeGo.

10. MeeGo

MeeGo was called a mobile platform, but it was designed to run multiple electronic devices including handhelds, in-car devices, television sets, and net books. All the devices on which MeeGo can have the same core but the user interface is entirely different according to the device. In 2010, Moorestown Tablet PC was introduced at COMPUTEX Taipei, which was also a MeeGo powered device.
